

2021 Pecan Spray Recommendation

KPHITE® 7LP
SYSTEMIC FUNGICIDE BACTERICIDE

Pecan Sprays - April through Early-June

Timing	Product	Rate per acre	Benefits
Spray 1.		2-3 quarts per acre	Outstanding leaf scab control used alone
Spray 2.		2-3 quarts per acre	Systemic Movement to root system
Spray 3.		2-3 quarts per acre	Improve root health - phytophthora and root disease complex
Spray 4.		2-3 quarts per acre	"LOW RISK" FUNGICIDE RESISTANCE CLASS (allows growers to use multiple, sequential applications)

Notes: **For (leaf-scab) sprays Kphite 7LP may be used alone at 2 quarts per acre**
Kphite 7LP has no restriction of amount applied seasonally or annually
Kphite 7LP is compatible with Boron, Zinc, Nickel, Sulfur, and Calcium products. If in doubt conduct a jar test.
For minor elements listed above **avoid Lignin or Nitrate based chelates**
For Kphite 7LP use 1 pint per 100 gallons NIS 80/20
Do Not use penetrants or stickers with Kphite 7LP
Always refer to the product label before use
